

The email your green belt sends

The jargon-dense email used in the demo; read it once, then watch AI turn it into plain English.

The email (verbatim)

FROM: Marcus Bell, Green Belt, Patient Throughput Initiative
TO: Priya (White Belt)
SUBJECT: Q3 baseline metrics, patient throughput

Team, attached are the Q3 baseline metrics for the patient throughput initiative. Our current process capability sits at 1.1 Cpk against the four-hour target, well below the 1.33 benchmark. The Pareto reveals that registration and triage account for sixty-two percent of total cycle time variation, with overflow boarding contributing another eighteen percent. Suggest we focus the analyze phase on those two CTQs. The control chart is showing two consecutive points above the upper natural process limit at the South campus, which suggests special cause variation worth investigating. Let me know if you want a pre-read before the steering.

Do not worry if none of this makes sense yet. That is exactly the point.
