

Patient complaint log

Source 2 of the VOC demo: a twelve-entry patient complaint log, each entry with its recorded category and verbatim wording.

Patient complaint log (verbatim)

1. [Wait time] "I sat in that waiting room for almost three hours before anyone took me back. Three hours with chest pain."
2. [Communication] "Nobody told me what was going on. I kept asking how much longer and the staff just said they didn't know."
3. [Wait time] "My daughter's fever was spiking and we waited over two hours just to be seen. That is unacceptable for a child."
4. [Staff courtesy] "The triage nurse was short with me and made me feel like I was wasting her time by being there."
5. [Wait time] "I left after waiting four hours. I never even saw a doctor. I drove to an urgent care instead."
6. [Cleanliness] "The waiting area was dirty, there was trash on the floor and the bathroom was out of order the whole time."
7. [Communication] "No one explained why patients who came in after me were being taken back before me. It felt random and unfair."
8. [Wait time] "The wait was so long that my pain medication from home wore off before I was ever seen by a provider."
9. [Process] "I had to give my insurance information three separate times to three different people. Why?"
10. [Staff courtesy] "The doctor was wonderful once I finally got back, but getting there took forever and I almost gave up."
11. [Wait time] "I understand emergencies come first, but four hours for a possible broken wrist with no update is too much."
12. [Communication] "There was no clock, no estimate, nothing. You just sit and wait and have no idea if it will be one hour or five."

Compile this by source, do not theme it. The chest-pain entry (#1) is the one the lecture calls out as preserved verbatim rather than tidied into long wait.
